

First visit after surgery, instructions for Crown Lengthening

1. Now that your sutures and the periodontal dressing have been removed, you may experience some sensitivity at the Surgery site. Please use anti sensitivity toothpaste or gel provided.
2. Keep the area clean with the soft brush provided, it is ok to brush the tissue as well as the tooth surface.
3. Do not floss yet
4. Please keep using salt water rinses as this will aid in the healing process.
5. We will see you back in two weeks to monitor your healing.
